(54) SKIN PREPARATION FOR EXTERNAL USE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a skin preparation for external use, activating the metabolisms of dermic fibroblasts, preventing the damages of the fibroblasts due to UV light, thereby effective for preventing or improving skin-aging syndromes such as the generation of wrinkles and stains and the deterioration in the elasticity of skins due to the various stresses of aging, UV light and the like, and having an antiinflammatory activity, a wound cure-stimulating activity and a moisture-retaining activity.

SOLUTION: This skin preparation for external use contains the extract of cultured *Agaricus blazei* Murill mycelia or the culture filtrate of the *Agaricus blazei* Murill mycelia as an active ingredient. The *Agaricus blazei* Murill may be cultured by either of a conventional solid culture method and a conventional liquid culture method, but the latter is preferable from the point of productivity. The culture medium used for the culture preferably contains various nutrients necessary for the growth of the fungi, but may be an ordinary culture medium.
